

Letter to our Community

On Tuesday, March 17, 2020, Kentucky Governor Andy Beshear, with guidance from the Center for Disease Control, The World Health Organization, The Kentucky Funeral Directors Association, and The National Funeral Directors Association, set forth guidelines as it pertains to Kentucky deaths and funeral services. His requirements are that NO PUBLIC VISITATIONS OR FUNERALS be held at this time, only private services with a small number of family members in attendance. In addition, CDC Guidelines, dictate that gatherings be 10 people or less.

Therefore, in accordance the Governor's recommendations, the undersigned funeral homes, in Madison County have until FURTHER NOTICE, ADOPTED THOSE GUIDELINES.

We stand united in doing our part to compassionately care for and serve our community. We appreciate your cooperation in working with us in honoring your loved ones in ways that are meaningful, and that also take into consideration current FEDERAL AND STATE GUIDELINES regarding public health and safety. As a caring community, we are facing the challenges that are arising with the Coronavirus.

Please know that all funeral homes are open and serving families, in accordance with these temporary guidelines.
